-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 11 is rejected under 35 U.S.C. 102(e) as being anticipated by MacInnis et al, US Patent 6,768,774, hereinafter, MacInnis.

As per claim 11 MacInnis teaches a CPU with an input/ output buffer see for example figures 2- 3; an input editor and a graph/ text converter electrically connected to the input/ output buffer see for example figures 4, 5 and 9; an algebraic logic counting unit electrically connected to the input editor see for example figures 7- 8 and column 22; a time generator see for example figure 5 blocks 162, 168, 176, and 188, a text display buffer see for example figure 5 blocks 59, 140, 178, a data read access memory see for example figure 4 blocks 86, 96, and 102, and a graph generator electrically connected to the algebraic logic counting unit see for example figure 4 blocks 104, and 108, the graph/ text converter electrically connected to the time generator, text display buffer and a graph display buffer, the graph display buffer electrically connected to the

Art Unit: 2676

graph generator see for example figure 5 ;an input unit electrically connected to the CPU see for example figures 1- 5; an output unit having a display and electrically connected to the CPU see for example figure 48 block 2014; a memory unit electrically connected to the CPU see for example figure 1 block 28.

Allowable Subject Matter

Claims 8- 10 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the prior art, either singularly or in combination, teaches or fairly suggests applicant's claimed invention of "determining whether a modification of the X,Y, and T values of the plurality of data sets are received from the input unit utilizing the central processing unit and executing an edit operation and modifying X,Y, and T values for the plurality of data sets utilizing the central processing unit when the modification of the X,Y, and T values of the plurality of the data sets are received from the input unit and proceeding to steps f, h and i when the X,Y, and T value of the plurality of data sets are not modified."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
